Product Overview

- In its 6th year the Lift remains a benchmark for all round performance C kites.
- The focus on the 07 Lifts has been to increase the smoothness of the power delivery and deliver consistent performance through all sizes.

Control Bar overview

Dedicated C-Kite control bar featuring:

- Modular control bar design to allow for multi functional leash, depower and line configuration.
- Options of On the fly stopper ball and trigger mounted cleat system or traditional strap adjustment system.
- 5th line standard on all control bars, easily removable system to allow 4 or 5 line options.

Compared to 2006

- Further refinements in construction by increasing seam, trailing edge and wingtip reinforcement.
- Increased focus on stability in smaller sizes.

Compared to the Flow

- More direct steering through dedicated C-Kite design.

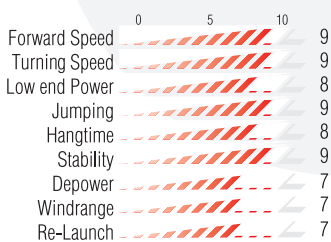

Compared to the Reactor

- The lift offers more stability and general ease of use.

Target customer

Intermediate to advanced C-Kite riders.

Performance Characteristics

Turning Characteristic**Key Selling points**

- Ideal for riding fast and aggressively
- Extremely responsive
- Precise handling
- Instant power delivery
- 4/5 Line modular control bar to suit all riding styles.
- Excellent wind range and de-power capability
